DETAILED ACTION

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Foreign Priority Paper (dated 11/20/01).

2. Claims 1-7 are presented for examination.

Drawings

3. The drawings are objected to because all blocks in figure 1 are not labeled with descriptive legend as required by 37 CFR 1.84(o). Correction is required.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 6. Regarding claim 6, it is not clear how a power failure can be managed without particularly point out the method steps. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

 Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.
- 7. Claim 7 is also rejected for incorporating the above deficiency by dependency.

Application/Control Number: 09/933,856

Art Unit: 2116

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 1-4 and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byers et al. [Byers].
- 10. Regarding claims 1, 3 and 5, Byers teaches a power failure managing device in a system, comprising:
 - a backup power source [Fig. 1; col. 5, line 44];
- a CPU having a processing unit (processor 14) that detects a power failure and actuates said backup power source upon detecting said power failure [col. 5, lines 47-51]; and
- a rewritable memory that records the status of said system at the moment of said power failure [col. 5, lines 45-47; col. 6, lines 6-10];

wherein if said backup power source is not properly functioning, information is recorded in said memory [col. 6, lines 8-10].

Byers does not explicitly teaches that the backup power source is monitored for determining whether or not the backup power source is properly functioning. However, Byers detects the failure of the backup power source [col. 6, line 10].

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of Byers to use the existing power source monitor device (19)

to monitor the operation of the backup power source. The modification would increase the reliability and the integrity of the system by preventing the system crash and the loss of critical data due to the failure of both primary and backup power sources.

- 11. Regarding claim 2, Byers teaches that the information is stored in the memory upon backup power source fails [col. 6, lines 8-10].
- 12. Regarding claim 4, Byers teaches that the backup power source is rechargeable [col. 8, lines 51-53].
- 13. Regarding claims 6 and 7, since they recite method of operating of the apparatus defined in the apparatus claims, they are rejected accordingly based on the rejection of the apparatus claims.

Conclusion

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan N. Du whose telephone number is (571) 272-3673. The examiner can normally be reached on Monday and Wednesday-Friday: 10:00 AM - 8:30 PM, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne H. Browne can be reached on (571) 272-3670.

Central TC telephone number is (571) 272-2100.

The fax number for the organization is (703) 872-9306.
